

*“Life is largely about doing things that make a person feel fulfilled. I call it “Living the Dream.” The opportunity to become an intern with Coady is exactly that; a chance to impact change, be changed and live out a dream.”*

## Ravi Jaipaul

Ravi Jaipaul comes to us from the humble rodeo town of Ponoka, Alberta. He recently graduated with a Bachelor of Science in Nursing degree from the University of Alberta. This will be his first journey to East Africa, and he’s going prepared with an open mind, a wide smile and a thirst for adventure.

Ravi feels honored to be working in Rwanda at the Kigali Health Institute with the Nursing Department. He will be working with their outreach programs, teaching various nursing classes (from genetics to analytical chemistry) and conducting clinical placements for student in district and learning hospitals.

Kigali Health Institute is an education institute which trains and improves the capacity of health professionals.
